Visually Detects

- **Crane Skewing**
- **Runway Rail Head Wear and Condition**
- **Damaged Runway Rail Clips**
- **On-Board Cameras**

Measures

- **Rail Straightness**
- **Rail Span**
- **Rail Elevation**
- **To CMAA Spec 70 Guidelines**

Not only does the patent-pending TrackRunner™ Robot provide the charts and data in a written report to review with the customer, the Whiting difference is that actual data is acquired real-time during the analysis. This significantly reduces downtime and improves accuracy.

**Rail data at your fingertips like never before...**

www.WhitingCorp.com/services
Easily identify problems like pitting and rail head damage and pinpoint precisely where the problem is located on the rail.

The owner can view every square inch of the rail conditions/findings and retain this information for their crane maintenance records.

**CONTACT WHITING SERVICES TO KEEP YOUR CRANE RUNNING SMOOTHLY, EFFICIENTLY AND RELIABLY.**
